

ACHRAF MTIR

Fullstack web developer

Hammam Sousse, Tunisia | ashref.mtir@gmail.com | +216 94098868

PROFILE

Passionate software developer that picked up the field as a hobby first, I always evolve with the latest technologies as i grow my passion for the field with focus on clean structuring and knowledge passing between team members, as a technical lead I focus on applying design patterns in the workspace and lead other members to make decisions based on discussion and requirements coupled with my experience in ui/ux best practices and problem solving skills.

PROFESSIONAL EXPERIENCE

- **Technical Lead at Barthauer Software, Sousse**

January 2025 – Present

- Leading my team members to deliver requirements and manage the workflow.
- Mentoring interns and helping them throughout their training.
- Taking decisions in choosing tech environments.
- Designing application structures and dividing logic over libraries and feature modules.
- Helping other devs to understand our workspace and finding solutions to their integration problems.

/ Tech-stack: Angular, Ts, .Net Framework, C#, MaterialUi, DevExtrem.

- **Fullstack Web Developer at Barthauer Software, Sousse**

June 2023 – January 2025

- Working on a large workspace on numerous applications with a focus on code abstraction and refactoring.
- Creating multiple libraries that have been integrated in multiple applications for 10000+ clients worldwide.
- Doing multiple pair programming sessions that lead to honing my communication and mentoring skills.
- Working on automation systems like Jenkins to maintain pipelines and projects build processes.

/ Tech-stack: Angular, Ts, .Net Framework, C#, MaterialUi, DevExtrem.

- **Fullstack Web developer at TMS, Sousse**

February 2023 – May 2023

- Worked on mostly e-commerce websites for our clients and got to know best practices for e-commerce seo and ui/ux experience.
- Discovered the WebDev cms that accelerates the development process where it offers multiple ready to use components.
- Honed my skills in customer support and minimized negative client feedback by understanding requirements profoundly.

/ Tech-stack: WebDev , SQL, HfQSL.

- **Fullstack developer at Creo, Sousse**

May 2022 – February 2023

- Developed a custom UI library that increased developer productivity and code reuse, based on MaterialUi components.
- Participated in UX design to ensure hitting the requirements of our clients.
- Structured numerous databases that made scalability easier.

- Focused on seo benchmarks on lighthouse from chrome.

/ Tech-stack: React, NextJs, ExpressJs, NodeJs, MongoDB, MaterialUi.

- **Fullstack developer at Anytime&Anywhere, Sousse**

January 2022 – April 2022

- Took the responsibility of developing websites and getting to know the market needs.
- Participated in ui/ux design integration, implementation, and development.
- I got to work on hosting our solutions on numerous hosting providers and discovered mailing protocols, DNS records, ssl integration.

/ Tech-stack: React, ExpressJs, NodeJs, MongoDB..
